WELCOME!

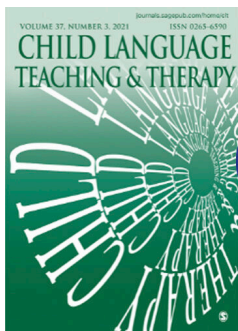

Sing and Speak 4 Kids is the flagship program of iQsonics, an online, evidence-based music language program that supports young children with delayed speech development. It is a fun, interactive game for kids!

Sing and Speak 4 Kids has helped many children overcome delayed speech including children diagnosed with Autism Spectrum Disorder (ASD).

Our team of researchers, neuroscientists, musicians, artists, therapists, and educators are designing products and services that reach the target population in clinics, schools, and families at home. iQsonics brings sound and neuroscience together for health, education, and fun!

In 2016, CEO, David Sonnenschein collaborated with music therapist Dr. Hayoung Lim to adapt her therapy into an online program.

In 2022, SS4Kids published a peer-reviewed journal article about the effects of Sing and Speak 4 Kids in the Child Language Teaching and Therapy journal with SAGE Journals.

Mission Statement: Our mission is to make our language program game available online to all children who struggle with delayed speech and their training team of therapists, teachers, parents, and caregivers.

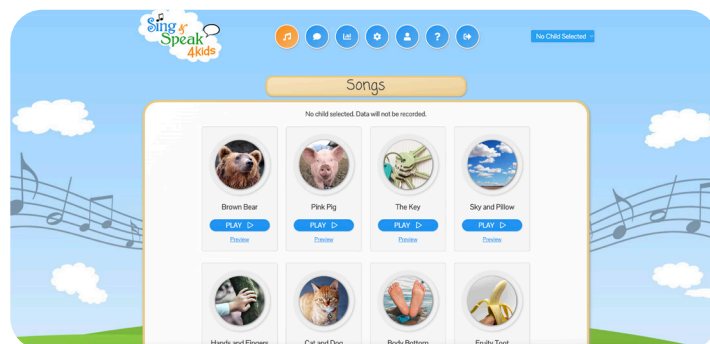

Our Research: Our team's collaboration reflects the goals of integrating and implementing this parent-mediated intervention in the clinical practice of speech-language pathology, special education, and family engagement. Learn more about our research on our website.

WHAT IS SING AND SPEAK 4 KIDS?

Sing and Speak 4 Kids (SS4Kids) is a clinically tested music therapy that promotes the development of children ages 18 months through 7 years who struggle with delayed speech.

As an evidence-based practice, SS4Kids can be effective by playing three times a week for only 10 minutes a day. Parents and professionals who accompany the child, can track outcomes in realtime.

SS4Kids reinforces vocabulary words and generalization and socialization in the children's environments and daily activities.

Who May Benefit

- Any child who has delayed speech
- Autism Spectrum Disorder
- Down Syndrome
- Intellectual Disabilities
- Dual Language Learners

Puzzle Pieces

Puzzle Pieces is a term we use to describe the connecting people who surround and support the child playing SS4Kids.

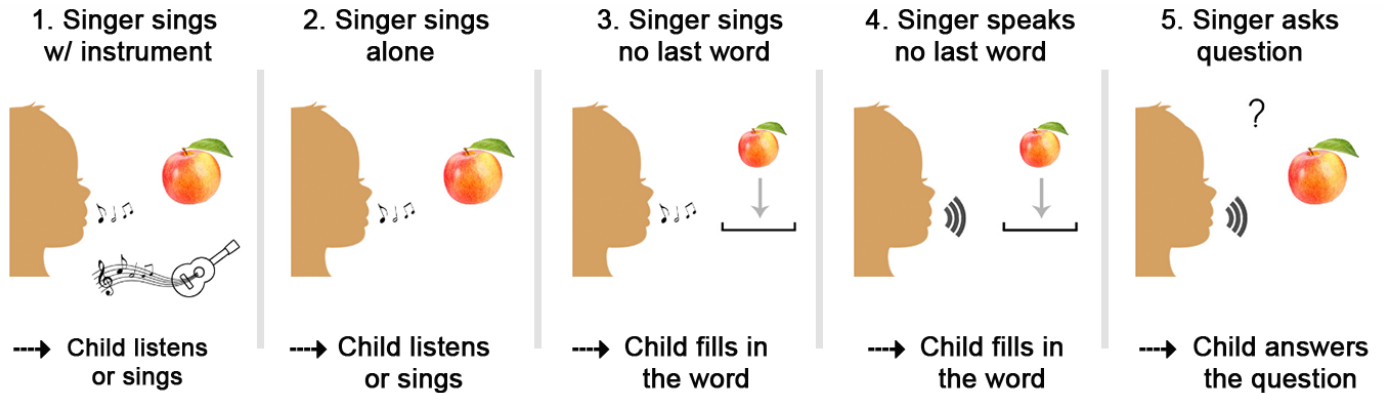

Puzzle Pieces include:

- Child's Parents / Caregivers / Family
- Child's Clinic / School
- Child's Therapist / Teacher / Clinician

When we connect each puzzle piece, we create a collaboration that works together to help the child and each other. This creates a routine intervention at home and at school.

HOW SS4KIDS WORKS

Program Features

- Supplemental therapy tool for professionals
- 18 songs and 84 target vocabulary
- Low cost monthly membership for parents
- Universal online access
- Professional speech assessment tools
- Training materials
- Resources for families and professionals
- Support group
- Data tracking and progress reports
- Simple and flexible
- Fun for families
- Game support

ADDITIONAL BENEFITS:

When parents, caregivers, clinicians, and teachers play SS4Kids with a child, they are creating a bond with the child and helping to instill word recognition. A parent, caregiver, clinician, and teacher may begin using those words strategically in their daily vocabulary.

WHY SIGN UP?

“Singing allowed him to absorb the material and pick up these words that he now uses in his everyday life.” - Mom of a 2-year-old

“Sing and Speak 4 Kids is a fun and creative way of teaching my daughter vocabulary. I use it to improve her speech and she loves playing it. She’ll say, ‘I want Pink Pig,’ and drag me to where the computer is.” - Mom of a 3-year-old

“As an SLP, I understand the importance of collaborating with parents to support their children. SS4Kids was simple to integrate into my teletherapy sessions with my clients and was effective at eliciting language in a fun and supportive environment.”

- SLP in a Public School District

How Administrators Benefit

Providing SS4Kids to your network and clients can:

1. Bridge activities from the institution to the home.
2. Give access for families in need who live at distance.
3. Maintain updated progress reports of children.
4. Help train parents to be engaged in the learning program
5. Provide staff with more tools and resources to offer to their clients
6. Offers cost effective intervention and learning tool.

HOW TO LEARN MORE

Join a SS4Kids Live Webinar

Our Live Webinar is for parents, caregivers, professionals, teachers, clinicians, administrators, funders, and anyone who wants an opportunity to ask questions and know more about how this learning program can benefit your child or client.

Our webinar will cover these following topics:

- Who We Are
- SS4Kids History
- How to Play SS4Kids
- Registration Process
- Our Research
- How SS4Kids Helps
- How to invite a parent or professional
- And more!

Register for the Live Webinar on our website or scan our QR code.
